

CERTIFICATE OF COMPLIANCE

CLASS "A" CERTIFICATION

This is to certify that the roof covering installed under the building permit listed below meets the requirements of a Class "A" fire retardant roof.

- CLASS "A" composition shingles with 15 lb. felt
- CLASS "A" built-up roof

INSTALLATION PROCEDURES: Roofer to state method of application of all materials and provide information showing that system meets Class "A" with UL listing number.

RE-ROOF SHEATHING VERIFICATION

- I certify that the existing sheathing/decking is structurally sound and complies with all conditions of 2025 R908 of the California Residential Code (CRC). Minimum clearances to combustibles for all VAC. Vents/chimneys have been verified and maintained.
- I certify that the roofing materials have been installed and fastened in accordance with the manufacturer's installation instructions, Chapter 15 of the Town Municipal Code, and all the requirements of the California Residential Code.
- Replacement of 25% or more of sheathing/decking shall require a 405 - Roof Nail inspection.
